

VULKANIJA

The Vulkanija Adventure Park presents the forces within the Earth's core and the geological processes that take place on or near the surface. These forces have been shaping the land and sea throughout the history of our planet and have also played a significant role in the geological history of Goričko region. Visitors can learn about the power of volcanoes and their activity through images, text and film, through play and interactive content, all of which will leave a lasting impression and help you overcome your fear of volcanoes. Experience volcanoes and the geological history of Goričko at the Vulkanija Adventure Park.

Dear friends, welcome to a wonderful volcano adventure!

Learn about nature and geological features of the Goričko region and experience local hospitality.

VULKANIJA

ADVENTURE PARK VULKANIJA

An unforgettable experience
of a volcano that was active
3 million years ago in the territory
of present-day Slovenia.

Grad na Goričkem, Slovenia

LEARNING, STUDYING AND PLAYING

Learn about the different volcanoes, their features, what makes volcanoes useful and why people settle near them despite the imminent danger.

We offer guided tours, interactive content and games for children. Visit the basaltic tuff quarry and buy a souvenir at Oli's shop.

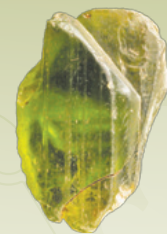

A JOURNEY TO THE CENTRE OF THE EARTH

The roots of every volcano lie deep within the Earth where magma builds up before erupting. Stroll through a lava tube and take the elevator to the red-hot underworld.

The tour of the volcano world is guided by Oli the Mole, an expert on the underworld, and particularly volcanoes and geological features of the Goričko region. He is endlessly pursued by Eza the Witch who wants to get her hands on OLlvine crystals. Will she succeed?

An olivine crystal from St. John's Island. Collection of the Slovenian Museum of Natural History.
